Hi Vu,

I am a student in the DSPM course and came across some questions when doing the data cleaning for the final project (VSP).

Could I come to your office hours today at 4.30 pm at HBH3008? Or if possible, are there any other earlier time slots?

Best,

Zhuoyuan

Hi Zhuoyuan,

You can come at 4pm. I also realized there was a matching problem in the dataset. I asked the professor and I am currently waiting for his reply. Do you have this same problem?

Yes! I find the products in the 'demand' dataset can't match any product code in the three 'products' dataset. That's what I want to [ask.co](#)

Sure, if that's the case, I will follow up with prof and let you know once he gets back to me. Hopefully he can contact the PIC at VSP so we can have this problem resolved asap.
